

Product Information Sheet

Product Name: Recombinant DJ-1 (PARK7) Protein, Human

Catalog Number: AS-72219

Lot Number: See label on the vial

Amount/size: 10 µg, 100 µg, 500 µg

Source: The sequence (Accession # NP_001116849) corresponding to the full length human DJ-1 protein along with N-terminal GST tag was expressed in *E. coli*. The recombinant DJ-1 protein was purified from bacterial lysate using GST affinity chromatography followed by GST tag cleavage and removal. The molecular weight of the recombinant DJ-1 protein is 19.9 kDa.

Activity: Cleaved DJ-1 was assayed for the protease activity using Sensolyte® Green Protease Assay Kit (AnaSpec Cat.# AS-71124).

Applications: ELISA, WB, Protease Activity

Purity: Greater than 95% as determined by SDS-PAGE.

Storage: The purified DJ-1 is supplied as sterile and frozen at 1 mg/ml in 50 mM Tris-Cl/150mM NaCl, pH=8.0. Store at 2-4 °C for immediate use within 1-2 weeks or at -80 °C for up to 12 months. Avoid repeated freeze-thaw cycles.

Instructions: DJ-1 (also known as PARK7, Parkinson disease protein 7) is a 189 amino acid protein that is ubiquitously expressed in many organs including brain, liver, kidney, pancreas, heart, and others¹⁻⁵. Although DJ-1 was originally discovered as a novel oncogene product, it was found to play several other roles in biological processes. They include regulation of RNA binding activity, fertility, anti-oxidative stress, and linked to the early onset of Parkinson disease when mutated¹⁻⁵. Recently it was demonstrated that DJ-1 can act as an atypical peroxiredoxin-like peroxidase⁵ and possesses protease activity⁴.

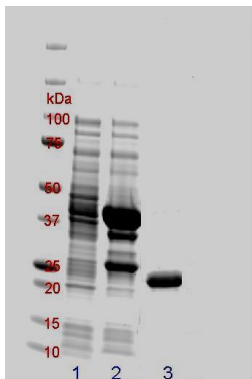

Figure 1.

Figure 2.

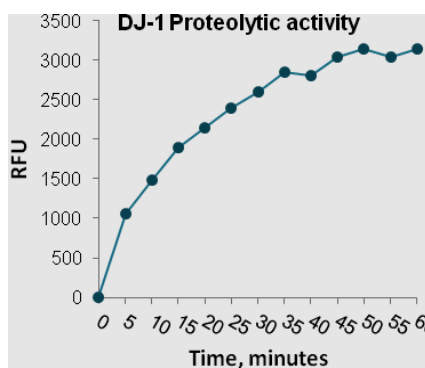

Figure 3.

Figure 1. Human DJ-1 on SDS-PAGE.

Purified DJ-1 was loaded onto 10-20% Tris-HCl gel at 3 µg/well and resolved at 200V for 40 min. 1=Uninduced cell lysate, 2=Induced cell lysate, 3=Purified and cleaved DJ-1 protein.

Figure 2. Western Immunoblot of DJ-1.

Purified DJ-1 protein was probed with anti-DJ-1 specific antibody.

Figure 3. DJ-1 Proteolytic Activity.

DJ-1 was loaded at 200 µg/well with 1mM DTT and assayed for proteolytic activity using Green Protease Assay Kit (AnaSpec Cat. # 71124).
